

Programming Project Proposal Due: 10/23/2008

Each student will create a programming project for the semester. Each programming project will be educational – however creativity is highly encouraged.

Proposal Format:

1. A short paragraph describing the proposed project.
 - a. Include a working title for your project.
 - b. Perhaps include justification for your choice of subject.
 - c. Perhaps include some general information about the subject.
2. A short description of the program's audience.
 - a. Perhaps include a scenario of its use.
 - b. Intended age group
3. Mockup of the screens anticipated for the software.
 - a. Storyboard the program's screens (optional)
 - b. What sort of information must be given on the screen?
 - c. Will it include a quiz component – if yes, in what form will it take – multiple choice, matching, etc?

Please type and then submit your proposal during lab on Thursday (10/23)
